UPLAND HOUSING MARKET

DANNY HERNANDEZ GONZALEZ

HISTORICAL DATA IN UPLAND

```python
import pandas as pd
import matplotlib.pyplot as plt
from matplotlib.ticker import FuncFormatter

df = pd.read_csv(
    "/content/City_zhvi_bdrmcnt_3_uc_sfrcondo_tier_0.33_0.67_sm_sa_month.csv"
)

# Keep only Upland, California
upland = df[
    (df["RegionName"] == "Upland") &
    (df["State"] == "CA")
]

# Money columns
money_columns = df.columns[8:]

# Display Upland, CA
display(
    upland.style.format("${:,.2f}", subset=money_columns)
)

# Last 10 years of monthly data
months = df.columns[-120:]
values = upland[months].iloc[0]

plt.figure(figsize=(14, 7))

# Full monthly line
plt.plot(months, values)

 # Put a dot every 12 months
 year_positions = range(0, len(months), 12)

 for i in year_positions:
     plt.scatter(months[i], values.iloc[i])

     plt.annotate(
         f"${values.iloc[i]:,.0f}",
         (months[i], values.iloc[i]),
         textcoords="offset points",
         xytext=(0, 10),
         ha="center"
     )

 # Show only yearly labels
 plt.xticks(
     [months[i] for i in year_positions],
     [months[i][:4] for i in year_positions],
     rotation=45
 )

 plt.title("Upland, CA Home Values - Last 10 Years")
 plt.xlabel("Year")
 plt.ylabel("Home Value ($)")

 plt.gca().yaxis.set_major_formatter(
     FuncFormatter(lambda x, pos: f'${x:,.0f}')
 )

 plt.tight_layout()
```

CITY VS STATE VS COUNTRY

Upland vs California:

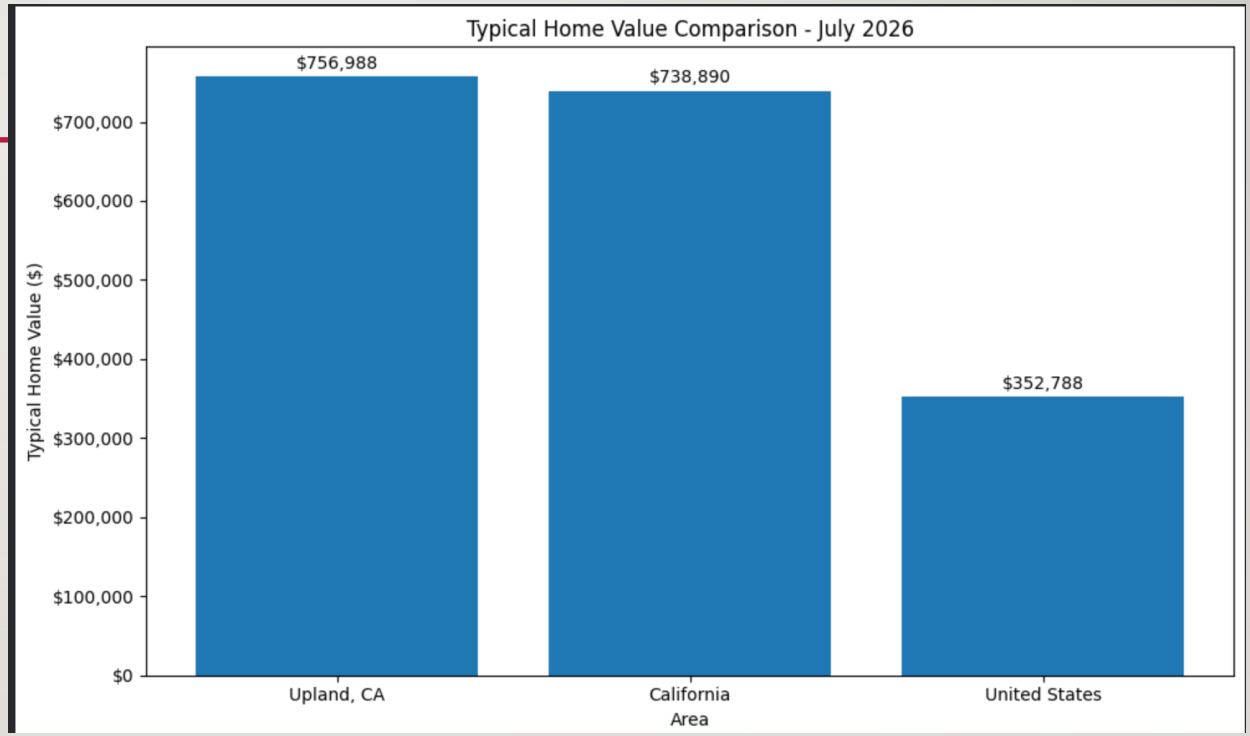

756,988 – 738,890 = 18,098

((756,987 – 738,890) / 738,890) * 100) = 2.45%

Upland vs United States:

756,988 – 352,788 = 404,200

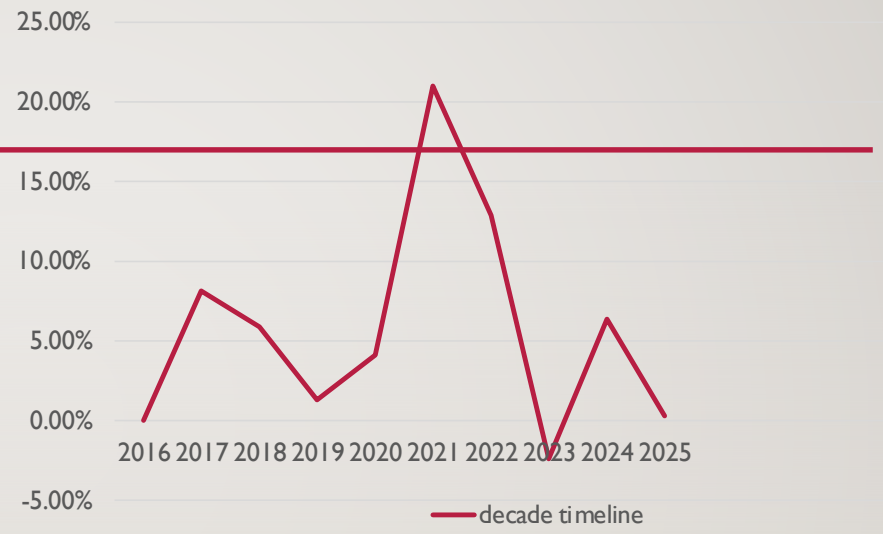

((758,988 – 352,788) / 352,788) * 100) = 114.57%

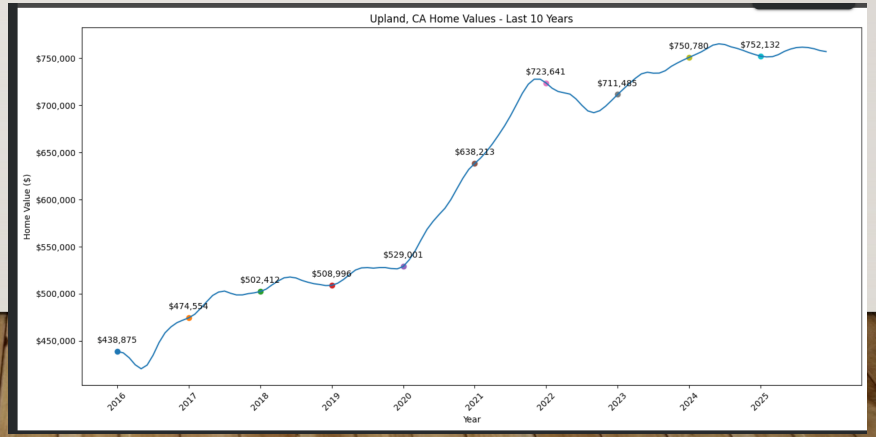

GROWTH RATE

- Growth Rate = ((New Value – Old Value) / Old Value) * 100

2016: $438,875
2017: $474,554
Growth: ((474,554-438,875)/438,875 *100) **= 8.13%**
2018: $502,417
Growth: ((502,417-474,554)/474,554 * 100) **= 5.87%**
2019: $508,996
Growth: ((508,996-502,417)/502,417 *100) **= 1.31%**
2020: $529,901
Growth: ((529,901-508,996)/508,996 *100) **= 4.11%**
2021: $641,155
Growth: ((641,155-529,901)/529,901 * 100) **= 21.00%**
2022: $723,723
Growth: ((723,723-641,155)/641,155 *100) **= 12.88%**
2023: $706,320
Growth: ((706,320-723,723)/723,723 * 100) **= –2.40%**
2024: $751,366
Growth: ((751,366-706,320)/706,320 *100) **= 6.38%**
2025: $753,563
Growth: ((753,563-751,366)/751,366 *100) **= 0.29%**

CAUSES

- **1. Raw Land → Land → Real Estate**
- **Raw land** → undeveloped
- **Land** → infrastructure/utilities added
- **Real estate** → buildings/improvements added
- Upland has converted/redeveloped land for **residential and commercial uses**
- Improvements can increase the **utility and value of the land**

CAUSES CONTINUED

- **New Housing / Development**
- Upland must plan for **5,686 additional housing units from 2021–2029**
- Rezoning + new development
- More:
  - Townhomes
  - Multi-family housing
  - Infill development
- Examples:
  - **Towns on First**
  - **Villa Serena**
  - **Rose Glen**
- Newer housing can attract buyers and change neighborhood values

CAUSES CONTINUED

Commercial Development / Amenities
Commercial areas have also been redeveloped
Packing District
Mountain Green Center
New:

- Restaurants
- Coffee shops
- Retail
- Services

More amenities → **greater desirability**
Greater desirability → **greater housing demand**

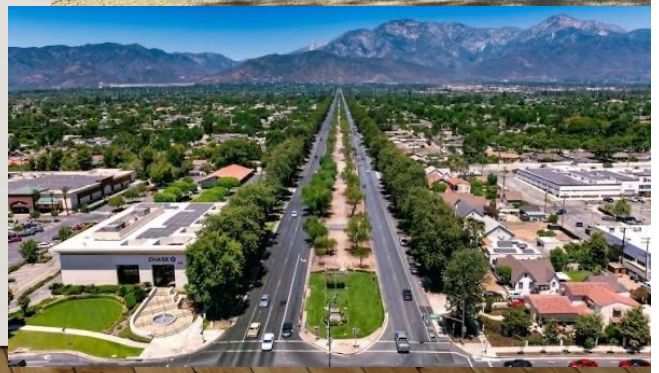

CAUSES CONTINUED

Location / Quality of Life
Upper Upland
- More expensive properties
- Higher-income area
- Helps raise overall city home values

Nature / foothills
- Open space
- Mountain access/scenery
- Recreation

Not as dominated by **warehouse/industrial development** as some surrounding Inland Empire areas

Metrolink / transportation access

Diverse housing/community
